

OUR ROTARY TABLES

New Functional Safety encoders and extremely compact sizes

In addition to the proven incremental encoders, we now also offer absolute encoders for our DMS and DMN rotary tables. With Functional Safety or a high-resolution measuring system – the right option for every application. In addition, the new DMN21 and DMN22 sizes

extend our particularly flat and lightweight DMN rotary tables. With an outer diameter of just 65mm, they offer all the advantages of direct drives even on a small scale. On request, we can also supply our rotary tables as a complete package with a matching servo drive.

Features:

- Functional Safety encoder available
- Various encoder options
- Available interfaces sin/cos $1V_{pp}$
EnDat 2.2, BiSS-C
- DMN series from 65 mm outer diameter
- DMS series suitable for cleanroom class 2 (ISO 14644-1)
